Name of the website: Bloom's bookstore

Description:
It's a website that contains a variety of books from different genres. These genres include fantasy, thriller, romance, action, etc. You can easily choose a book you want by selecting a genre and navigating through that. Once you choose a book, you'll see details regarding the book. This can include description/summary, ratings, reviews, number of pages, author, etc. You will have the option of giving it a review and rating yourself.

List of SOME page names:
About us, FAQ, home, contact, genres, top-rated/recommended books, etc

Data:
I will be storing and, if necessary, manipulating data and information regarding:
1. books (name, number of pages, author, rating, genre, price, summary/description, issue date)
2. User account (username, full name, password, address, email, saved/favorited books, ratings, review)
3. reviews/ratings (user ID, book ID, rating number, review text)
4. Ordering (user ID, book ID, amount paid, order date and time)
